

# SUREAQUA STRAW

ULTRA-THIN MEMBRANE WITH SPECIAL PROPERTIES

The membrane and total SureAquaStraw system is tested and approved effective by a NATA accredited laboratory.

POLYETHERSULFONE RESIN

A unique, technologically sophisticated micro-porous membrane filtration system is integrated into the SureAquaStraw.

## REUSABLE WATER PURIFICATION STRAW

100% Australian Owned & Made | Delivers Filtered Water | No Chemical Purification Tablets | No Chemical After Taste

Clean drinking water is a vital necessity for maintaining optimum health, so when you travel you know that maintaining a constant source of safe drinking water is a priority. You may already know that over 40% of travelers in third world countries and emerging nations experience some kind of water related sickness as a result of poor water quality, but did you know many Western countries also suffer from contaminated water systems? Did you know that bottled water can contain potentially dangerous levels of bacteria – even chemical contamination – or that the production and disposal of bottled water is having a major, destructive, environmental impact? The economical, environmentally friendly and totally safe SureAquaStraw is an essential personal safety product whether you are travelling overseas, backpacking, hiking or camping, or kept in reserve in your cupboard at home in case of natural or man-made disaster or contamination to your water treatment systems.

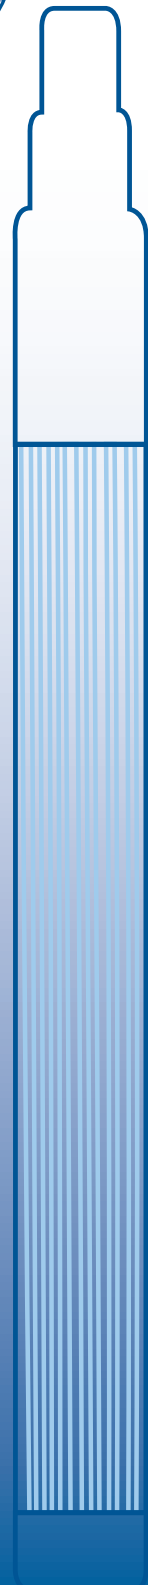

- SureAquaStraw is tested effective in removing 99.9999% of harmful bacteria and contaminants such as E-coli, Staphylococcus, Cryptosporidium, and Giardia.
- SureAquaStraw is a chemical-free, micro filtration technology with no contraindications for use. Safe for everyone!
- SureAquaStraw not only meets but exceeds by a factor of 5 the standard set by the Centre for Disease Control and Prevention, U.S.A. For effective removal of Giardia and Cryptosporium filtration must be at a level down to 1 micron. SureAquaStraw filters down to 0.2 micron.
- SureAquaStraw is simple, quick, and clean to use. Dip the straw's tip straight into water and drink immediately. Reusable up to 500 liters (132 gallons) slashing the environmental and personal financial impact of bottled water.

## FACTS ABOUT WATER QUALITY

- Cryptosporidium is a hardy foe whose oocysts a spore-like phase in the parasite life cycle remain stable outside a host for long periods and are resistant to conventional water treatment such as chlorine disinfection." ScienceDaily (Apr. 26, 2010)
- Over 30% of bottled water tested had chemical or bacterial contamination (Natural Resources Defense Council)
- Approximately 25% of bottled water is "legally" just tap water (Food and Drug Administration)
- Approximately 60% of bottled water is "legally" untested (Food and Drug Administration)
- Approximately 45% of international travelers experience gastrointestinal upsets
- Over 4% of international travelers are sick with diarrhea for more than 4 days
- Over 4 million people die of drinking water related illnesses each year (World Health Organization)
- Over 40 million in the U.S.A. drink water from contaminated systems (Natural Resources Defense Council)

## BENEFITS OF SUREAQUASTRAW

SAFE	From children 12 months of age to the elderly	HEALTHY	Protects against bacteria
SAFETY CUT OFF	Water will not pass through when volume capacity is reached	EFFECTIVE	Filters down to 0.2 micron
CHEMICAL-FREE	No chlorine – No iodine – No adverse reactions	SECURE	Removes up to 99.9999% water borne bacteria
ECONOMICAL	REUSABLE up to 500 liters (132 gallons)	NO TASTE	No unpleasant chemical taste – No after-taste
ENVIRO-FRIENDLY	Reduces carbon footprint	HIGH QUALITY	Fully tested
		ISO STANDARD	NATA accredited laboratory
